

Symbol layer assignment rule for 3D Surfaces

3D PREFIX	<i>indicating category</i>	COLOR NO.	<i>indicating general material type</i>	SUFFIX
AFUFU	Furniture	001	Fabric/Leather	A
AFUSE	Seating	002	Plastic	B
AFUPA	Panels	003	Metal	C
AFUEL	Electric Devices	004	Glass	D
AFUAC	Accessories	005	Wood	E
AFUPB	Post and Beam	006	Stone/Ceramic	F
AFUMI	Miscellaneous	007	Miscellaneous	...

3D PREFIX – Reduced to the 7 main types of product categories that have been used over time

COLOR NO. – Reduced to the 7 main general material categories

SUFFIX – The suffix is added to differentiate surfaces in situations of various finishes of the same material (e.g. contrasting fabrics, different fixed finishes of plastic etc.). This applies per project only, meaning that if layer AFUFU-3D-002-A is assigned to surfaces receiving a fixed gray finish inside one project, the same layer can be used for any other finishes/colors of plastic for other projects.
