2020 Insight

Planning & Scheduling

On-time performance and profitable operations depend on coordinating many processes so that the right parts are available in the right place and at the right time. 2020 Insight allows you to schedule your production to match your manufacturing processes and customer orders. Accurate sales and production information is used to improve demand planning and fulfillment scheduling. Shipping schedules are created based on your business rules and managed in real-time to provide you with full visibility into the delivery process. 2020 Insight is specifically designed to support the unique production planning and scheduling requirements of the furniture manufacturing industry.

Make it easier to efficiently execute shop floor activities.

Define your manufacturing processes and constraints and 2020 Insight will generate production schedules to match your environment.

Make it easier to reduce inventory costs.

Using real-time demand management, work in process inventories can be reduced by up to 90% in key work areas.

Benefits

Improve Production Scheduling

Create production schedules that maximize resource utilization by matching sales orders to manufacturing processes.

Find Best Fit Solutions

Define your business rules based on your environment and automate workflows to manage production planning.

Create More Scheduling Options

Organize production schedules based on dates, product features, shipment schedules, customer requirements, or order characteristics.

Increase Productivity

Reduce your direct labor costs by optimizing demand planning and fulfilment scheduling.

Make it easier to manage shipping scheduling from within the production workflow.

Schedule shipments in real-time to improve customer service and reduce shipping costs.

Make it easier to be best in class.

2020 Application Specialists go beyond the software to help you develop manufacturing processes that enhance your business performance. Our professional services team has real-world experience working with furniture manufacturers globally to develop and implement best practices.

Features

Production Planner

Create user-defined schedules that match your manufacturing processes and business logic to optimize production.

Multi-Attribute Scheduling

Manage production schedules using any order, customer or product attribute such as date, product features and shipment schedule.

Shipping Management

Create flexible schedules in-sequence or independently to integrate shipping with your manufacturing process.

Demand Planner

Real-time material demand planning maximizes resource utilization while maintaining on-time delivery.
