

Your finance, CRM and other systems depend on timely and accurate operational data from your order and manufacturing system. 2020 Insight uses standards-based interfaces to quickly integrate with Customer Management, Accounts Payable, Accounts Receivable, Inventory GL and legacy ERP systems. Out of the box support is provided for Microsoft Dynamics GP and CRM, with many custom interfaces to other popular business support systems from SAP, JD Edwards and others. 2020 Insight helps improve your business system performance with accurate and real-time data sharing.

**Make it easier to improve your financial reporting.**

Enhance your financial management with accurate real-time information from a single source.

**Make it easier to manage your check book.**

Automatic receiving, invoice matching and customer invoicing connect directly to your AR and AP for seamless cash flow management.

**Benefits**

**Simplify system integration**

Easily integrate with existing accounting, customer, supplier and legacy systems using standard interfaces to leverage existing investments.

**Enhance business performance**

Manage customers and suppliers better with timely operational data from order entry to installation. Integrate data into existing business systems and processes.

**Improve data quality**

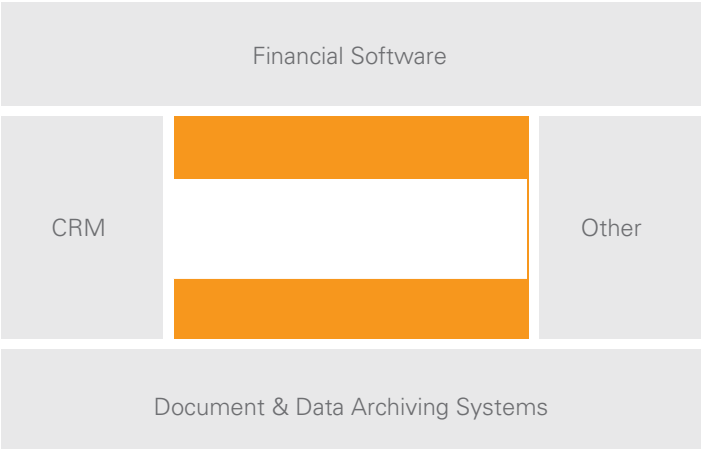

Accurate operational data from 2020 Insight provides a reliable real-time data flow to other business support systems.

**Reduce system complexity**

2020 Insight provides a single source of end-to-end operational data to other business support systems to streamline IT operations.

Make it easier to enhance your client’s experience.

Manage your customer business rules within the order processing workflow by integrating 2020 Insight with your existing customer relationship management system.

Make it easier to implement 2020 Insight.

We go beyond the software to understand your entire business and build solutions that work with your environment.

Features
