Introduction

20-20 Technologies Inc maintains an operating system support policy that reflects Microsoft's own lifecycle policies wherever possible.

In the past, we undertook a series of development activities for 2020 Design that resulted in successive Microsoft compatibility certifications. To maintain Microsoft certification, we conducted a series of test cases to determine which operating systems are capable of supporting 2020 Design version 11.

As a result of this testing and consistent with Microsoft's policies, 2020 customers may need to upgrade their operating system before installing the latest version of 2020 Design.

In addition, we provide only limited MAC support under specific operating conditions.

Summary

A diverse cross section of test cases was selected to provide maximum coverage.

The following table summarizes the status of all tested Microsoft operating systems against the currently maintained versions of 2020 Design.

PC / LP Support:

Operating System	2020 Design Version 11
Windows 10 (32 & 64 bit) preview edition	Actively Supported ¹
Windows 8.1 (32 & 64 bit)	Actively Supported
Windows 8 (32 & 64 bit)	Actively Supported
Windows 7 (32 & 64 bit)(Home & Enterprise	Actively Supported
Windows Vista (32 & 64 bit)	Legacy Support ²
Windows XP,98, 98SE, ME	Not Supported ³
NT 4.0	Not Supported
Windows Server 2012 (both R1 & R2) 64 bit	Not Compatible ⁴
Windows Server 2012	Not Compatible
Windows Server 2008 (both R1 & R2) 32 & 64 bit	Not Compatible
Windows Server 2008	Not Compatible
Windows Server 2003 (32 & 64bit) and earlier	Not Compatible

¹**Actively Supported:** Consistent with Microsoft policy, these operating systems are currently used for regular testing of 2020 Design and are suitable for use when running the application.

²**Legacy Support:** Consistent with Microsoft policy, 2020 Design should still run on this operating system, but the system is no longer tested or supported. If an issue is identified that is directly attributable to this operating system, users will be advised to upgrade to an actively supported operating system.

³**Not Supported:** Consistent with Microsoft policy, these operating systems are not supported and should not be considered for use when running 2020 Design.

⁴**Not Compatible:** 2020 Design will not run on these operating systems.

2020 Design Software—Supported Operating Systems

Mac Support:

No tests were completed on MAC operating systems; however MAC operating system receives limited support:

Apple Macintosh using Bootcamp with the right **1Actively Supported** operating system

Conclusion

A reasonable sample of tests cases was executed using the most recent preview edition of Windows 10 (*v10.0.10145*). No issues specific to that context were identified.

Based on these test cases, 2020 Design appears to function at least as well on Windows 10 as on any other supported environment.
