

“Since I started planning to buy kitchen design software 10 years ago, my mind was set on a Microsoft Windows-based platform. 2020 Fusion, distributed in South Africa by Maxima Software, gave me exactly what I wanted. Maxima Software also turned out to have the fastest, most reliable support service in the market and an incredibly efficient delivery service. Our company is also at the stage where we are planning to subscribe to Maxima’s ERP application services—which also integrate with 2020 Fusion—to help us with the quotation process and cutting lists. MaxERP and MaxCUT will save us a lot of time once integrated into our systems; I look forward to this initiative being fully implemented. Maxima Software and 2020 Fusion will forever be a part of our business structure and processes, and I can’t wait to see what this will grow into over the next few years!”—*Ryno Botha, L & R Timber Crafts, Kitchen Bic Vanity*

L&R Timber Crafts, located in Limpopo, South Africa, specializes in custom veneer cabinetry and has been in business for over 22 years.

L&R TIMBER CRAFTS IS SERVICED BY MAXIMA SOFTWARE, OUR VALUE ADDED RESELLER:

In operation since 2001, Maxima Software delivers design, sales and manufacturing solutions for the kitchen, bathroom and interior design industries in Southern Africa. It develops, distributes and supports some of the most innovative software solutions in the industry including 2020 solutions providing clients with the competitive edge they need. Maxima takes the support of their exceptional products very seriously, as well. With a nationally-based support system, it can provide assistance when clients need it most.

At Maxima it’s not just about who they are; it’s about what they can do for you.
