Release Information

Application Version	Build Date	Build Type	Scripting Version
6.3.0.72	2018-07-09	Release	6300

Requirements (112)

1.1 6.0.2

108076 Tracker-Based Snapping Indicators

119908 Zoom control via Middle Mouse Button

120544 Background Processing For Multiple Views

121454 Prompt for style block when replacing items in a different style block

150210 New Rendering Solution (Pilot Phase)

165659 Centralisation of PCS Login - 2020 Fusion

173132 New Named Views Solution

173717 Effective Management of Local Catalogues

177220 Items Tab: Ability to Modify Options/Fields for Multiple Selections

182325 Apply Microsoft Office 2016 GUI to 2020 Fusion

197599 Support for Trimble SketchUp 2017

198978 Scripting Access to 'Realtime Block' Information (Copy Forward)

199153 Block Evaluation Dialog: New Warning Mechanism for Invalid Blocks (Copy Forward)

200426 Ability to Define Default Settings for a Connect Database (Copy forward from 5.5)

201809 2020 Cloud Decorative Items to be Correctly Recognised and Classified (copy forward)

203678 Connect: Use of 'Standalone' Catalogue Management System (copy forward)

205118 New Rendering Solution

208830 EANCOM - RFF - Ultimate Customer Reference To Use The [ClientName] Data Tag As Well As The Design Name (copy forward)

209385 Repositioning/Repurposing 2020 Cloud Ribbon Icons

209394 Improvements to Connect Database Management (copy-forward)

211338 Improved Sorting & Filtering of Style Types While Editing Block Items in CatAdmin (copy-forward)

212615 Realtime Block Evaluation: Additional Trigger Events (copy-forward)

212667 Implement Updated Movie Generation Tool

212812 Increase Version Index for Fabrega (v6.0)

- 212813 Add ability to program v6 and v7 dongles for DAS
- 212817 Resolve Issues with update speed after moving items (copy forward - elements)
- 213386 Scripted Room Access in Connect Mode (copy-forward)
- 215519 Network Printer Optimisation
- 216378 Open 'Modify Description' Dialog via Double-Click in Item List
- 216981 Named Views: Retain Unaltered Images and Current Tab Selection
- 218278 User Preferences for Prompt for style block when replacing items in a different style block
- 218696 IPDS - Map Sort Codes To General Data Field
- 225244 Unit List/Key: Option to Display 'Handing' (copy forward)
- 230262 Customer Cloud Management (CCM) System - Foundation Development
- 227808 Changes to Mouse Wheel Click Behaviour (Plan and Elevation)
- 202976 Change Materials For 2020 Cloud Products
- 212721 Update IPDS Upper (Title) Case DLT and Colour Strings Script to Include Unit Descriptions

1.2 6.1.0.52

- 118982 Automatic Removal of Duplicate Installation Dimension Rails
- 186176 Negative Threshold for Conditional Blocks
- 205096 EANCOM Order Generation: Option to Include Predefined Worktop Views
- 205723 Live Tracking/Birdseye Options for Perspective Named Views
- 206971 Block Summary Additions
- 209339 Ability to Run An Old Script (.rpt) From A New (.dll) Script
- 212198 Retirement/Integration of Restrict Image Size Checkbox (Export Backstage View)
- 212876 Addition Of Predefined Named Views to New Named Views Interface
- 218314 Warning Mechanism for AutoFeature Items in Additional Style Blocks
- 225245 Unit List/Key: Ability to Exclude Items from Specific Catalogues (copy forward)
- 225247 EANCOM: Export a Graphical Legend Section (Unit list/key) on a Named View (copy forward)
- 225572 Read Only Catalogue Access When Using 'Connect: Use of 'Standalone' Catalogue Management System' (copy forward)

225573 Export a Graphical Legend Section (Unit list/key) on a Named View (copy-forward)

227773 Print Areas to Be Named View Specific (Including Scripting Access)

230219 Connect: Ability to Define Set a Default Title when Creating New Customers (copy-forward)

230735 Customer Cloud Management (CCM) System - Foundation Development (copy forward)

233513 Catalogue Editor (Version 6): Support for Duplication (Copy/Paste) of LightWorks (Legacy Shader) Materials

233575 Scripted Batch Printing: Ability to Select Individual Predefined Tiling and Installation Views

234112 Support for Trimble SketchUp 2018

234901 Portals: Ignore Adjacent (Parallel) Panes of Glass

235900 Additional Scripting for Processing Events

1.3 6.2.0.78

126728 Unit List/Key: Improved Representation of Symbols and More Flexible Grid Management

159550 Batch Printing: Allow Different Printers (and Paper Trays) Per Batch Set Entry

177221 Filter behind primary wall should hide lighting units as well

183317 (Background Processing) Percentage Progress Indicator - Rendering, Exporting, Movie Generation, 360 Panorama

202052 Mouse Wheel Zoom: Ability to Function in Specific Tracker Modes

216078 Dimension Units with Different Orientation for close walls

216089 Manual Annotation in Named Views Enhancements

218208 No Prompt For Style Details After Running Block Evaluation

218265 'Sticky' Autofeature Selections

218950 Ceiling Fixtures

219085 Manual Annotation Arrow/Justification Enhancements

220098 Advanced Covering: Improved Snapping (Hotspot) Recognition

221022 Tracker-Based Snapping Indicators for Imported Design Layout Template

225668 Ability to Export Multiple Named Views Simultaneously

226594 Scripting Access for the Event 'Printing a Report'

227781 Add Palette and Items Tab: Additional Criterion & New Fields

Release Notes

- 230074 Linking Watermark Images in RWZ Reports
- 233505 Batch Printing Dialogs: Improved User Interface
- 221426 Scripting Access Required to Manual Dimensions (copy forward)
- 247987 Items Ribbon: Live Update of 'L:', 'R:' and 'Top' Fields
- 237656 Framework for Scripting Test Harness

1.4 6.3.0.73

- 224564 EANCOM: Option to Make Order Contact Name, Telephone & Email Address Mandatory
- 226464 Improved Management of Images in Report Wizard (RWZ) Reports
- 227873 Ability to Post-Process Views
- 233090 Report Wizard: Catalogue Families to be Used for Style and Height When Showing all Manufacturers
- 233093 Report Wizard: Ability to Show Deposit Including VAT
- 233509 'Select Catalogue' Dialog: Ability To Find Required Catalogue By Typing Characters
- 233510 Room Validation: Option To Validate/Update Trade Prices Only
- 233571 Report Wizard: Title Dependent Salutations
- 233697 Annotation/Dimension Font Size Relative to View Scale
- 234106 Connect Manage Catalogues Dialog: Retain Catalogue Selection After Performing Certain Actions
- 234111 Application of Modifiers: Improved UI/UX
- 234116 Report Wizard: Additional Tags for Totals and Deposit
- 234205 Reset Palette(s) Settings
- 234219 Enhancements to Management of Missing Catalogues in Fusion Standalone
- 235348 EANCOM: RFF+UC display the title from the customer
- 236875 Fusion to remove duplicated vertical installation dimensions - Further Enhancements
- 239820 Ability to Un/Hide Named Views
- 240291 Additional Default Settings for Predefined Views
- 240729 EANCOM Ordering: Product Range Name Changes
- 240736 EANCOM Ordering: Sales Contact Format Changes

- 240918 Named View Name to be added to PDF files created via 'Send To PDF'
- 241606 Report Wizard: Show Discountable Total (When Using Locked Price Items)
- 242016 Improve Robustness of ini file writing
- 244565 Mouse Wheel Zoom: Ability to Function in Covering Modes
- 244567 Zoom and Scroll for Covering Modes
- 230213 Tooltips for User-Defined Named View Tabs
- 235881 Scripting function to export report as DXF (copy forward)
- 248028 Colour Changes from 'My Images' to be Referenced in Fusion XML Export
- 248726 Application of New 3DE Settings For Laminate Glossiness
- 249161 3DE Rendering: Integrate New Diaphanous Fabric MCode Options
- 250570 Draft and Colour Fill Renders (Direct X) to Use Instant Radiosity
- 248527 Extend Scripting to Make Writing and Porting of Scripts Easier

Bugs Fixed (987)

1.5 6.0.2

186863 Fusion crashes if you order by EDI and an item name (recommended) has two spaces behind each other (by manual changes) (BR32695)

211190 Fusion crash if you move a installation symbol in the provided design (BR33270)

212315 Fusion crash when closing the room

214734 Linklists are unusable if you create a child catalogue and use the import products function (BR33427)

217251 Crash during import Products in Child Catalogue when Parent unit contains invalid links (BR33504)

216678 Fusion starts a lots of background tasks when closing a room via OpenCreateRoomEvent & exporting a view in a called QuitQuery (BR33493)

212509 Multiple price table exports the incorrect series ID numbers

218705 Freeze when selecting item with an invalid/missing parent (BR33547)

213831 2020 Fusion crash when adding a sketchup object

213038 Fusion crash when moving the guide rail to the middle of the room

217673 Closing multiple modified rooms in an SQL solution causes all but the first room to fail and require recovery

218304 Fusion crashes in high load scenario when multiple users are logged in to SQLServer database

211525 Scrolling to the bottom of the customer list on a specific user causes fusion to crash

219779 Crash while cancelling "edit worktops" in the supplied design (BR33600)

226934 Dumpfiles to check after many crashes in different situations (BR33986)

228758 Crash when using a catalogue with blocks with invalid start dates (BR34011)

228671 Performing an Item Name or Description Search in Grouped Units That Returns No Results Causes a Crash

229963 Crash during edit worktops after stretching edge (BR34081)

225661 When a string is too long and fails to add correctly the TLTableField still thinks it is added to the report (BR33945)

230371 Side-Effect: Factor validation fails if 'All Factor Groups' is enabled (BR34170)

225883 Unable to edit Description field in Edit Image dialog in Catalogue Editor

Release Notes

- 229329 -RunScript shows Fusion - Silent functionality isn't working (BR34102)
- 225607 By inserting new general text fields in general data, the general text fields in RWZ forms are changed (BR33887)
- 226420 "Factor list is valid" even though there are more than once the same factor (BR33767)
- 225248 360 Pano email not received when produced via background
- 223461 New designs are stored in the wrong customer (BR33866)
- 224179 A room that contains an oddly orientated worktop locks up Fusion(BR33874)
- 221042 Wrong result after executing the scripting function "BlockEvaluationTrade" (BR33672)
- 221487 Price validation doesn't fire when price is locked for the unit (BR33581)
- 219511 Texture (Length & Width) does not get applied to a material if setup using the copy paste method
- 219242 FOMS: Unexpected result after "Validate Database and File Store" and missing cat files in FileStore (BR33352)
- 219596 18-19 seconds to move a window in supplied room (with a tiled floor)
- 219228 Runtime error when running a universal report with supplied room
- 215162 Change Catalogue's Unit List Filter doesn't work properly (Side effect)
- 217088 It is not possible to import and append a second IDM file (BR33499)
- 218119 BlockEvaluationTrade sets retail prices to default when the method is called for the first time and no retail block is in room (BR33508)
- 216076 The style details show a wrong catalogue after select one in the following situation (BR33469)
- 219278 45 degree filler does not auto worktop correctly when a unit added between them falls into a certain size range in width
- 210236 Linked items cannot be moved manually in Item List when Group by Links is turned off
- 212206 Movie is not generated fully when generating through the background process
- 212529 Unable to Paste in the DLT Dependent Order Code window
- 214669 Unit descriptions over 255 characters cause a room to be recovered when closing and reopening an SQL database solution
- 205538 Catalogue editor is unstable and randomly crashes
- 211253 Manual Dims change position when opening and closing a room
- 211266 Manual Annotation no longer supports the Thai language

- 221809 Script method TSurface::SetColourNum does not work with colour ID over 32767 (BR32249)
- 189953 Changing between named views with the same background changes the background to a different one or blanks it.
- 191686 Few annotation gets lost in Shared annotations when other annotations are entered in the PPSHaredUser.ini
- 211194 Fusion does not correctly export models in AXS format
- 197992 Cannot Edit customer info in offline mode
- 200685 Order dimension of zero stops units from showing island dimensions
- 190767 Default valid series is not loading the associated fields
- 200417 Connect : A checked out customer's design gets checked In (without changing this status) in a particular scenario
- 211249 The wrong catalogue is deleted when sorting by file name and clicking remove in ce.exe (BR33238)
- 191689 "Render Setting" dropdown goes blank after applying artistic render to design
- 202125 Dealer Name is missing in the Info Block when using Background export
- 206901 Block evaluation shows invalid prices when multi-vat within a single balance group is used
- 204293 Wrong series info is displayed in Cat Admin after importing via Copy & Paste
- 204478 One of the design window view is not getting updated when unticked Gap Dimesions option under Item settings
- 205719 Connect : Imported design in offline mode doesnt reflect in online mode and also disappears when again switched back to offline mode
- 205772 Unit dimensions are not displayed for cloud unit when adding using add or double click option into the room
- 211263 Value for the next block clearing system is not correct if a trade factor is applied (BR33266)
- 211257 Certain Cloud models are upside down
- 203143 Grouped Items containing cloud models not keeping changes
- 211268 Info Block not displaying virtual wall number
- 211258 Change material dialog shows blank/white when replacing with a linked colour that is undefined
- 200428 Dimensioned elevation views in Insight attachment are not all dimensioned
- 191663 Order of balance group is not correct on block evaluation window

- 183968 Block Evaluation Info Bar not displaying +/- for unused amounts
- 211255 Longtext of some items is cutted in reports (only on the screen) (BR32944)
- 211269 CiCExport Script - descriptions containing commas and speech marks causes export format to be incorrect
- 210211 DLT Entry with large number of dependencies does not display in CE (BR33340)
- 215511 Catalogue.Compact does not compact using Fusion.Scripting.dll
- 215431 0 is not a valid value in the table GeneralDataRelated (BR33463)
- 216079 'HideUnavailableUnits' prefs settings hides available items in the Autofeatures Dialog
- 217083 Phone and Email information of a customer is not displayed in offline mode (BR33496)
- 218688 Userstrings file includes two different lines with the same ID number
- 227762 Fusion.Scripting sometimes fails to check for licence (when used in standalone projects)
- 217897 ConnectDatabase.OpenRoomForEditing via 'Startup' shows the 'Find Customer' dialog
- 221481 PDF dimensions look different to elevation view with provided design
- 224409 'Catalogue Items' details do not entirely refresh after DLT Change is made which changes the Unit List Selection with 'HideUnavailableUnits' feature active
- 227042 Window top inserts not drawn
- 219866 Surface covering not applying to worktop with sink
- 226815 Double dimensions if you plan in cm and move units (BR33764)
- 220779 Window Reveal Head tiled even though wall tiling zone doesn't reach that height
- 221828 Lookup customer dialog is shown before DW_FusionOpen is fired in Connect mode
- 221964 Items from Bosch Cloud catalogue not snapping to walls when first called into a room
- 222937 Empty Catalogue Items List with 'HideUnavailableUnits' feature activated shows a blank Add Palette, but valid information in Description, Dimensions, etc.
- 226461 The "Ceiling Filler" indent is not set correctly (BR33955)
- 226619 Dimensions not Updated correctly after searching for items on 'Catalogue Items' Palette with 'HideUnavailableItems' feature active
- 232936 Additional Lines added to reports
- 229444 Script Error details not appearing
- 226950 First character typed into certain text fields ignored

- 226952 Unable to copy and paste text in Images text field
- 226111 Changed VAT profiles won't be shown correctly during Room Validation (BR33959)
- 219514 The Return, Enter and Escape buttons don't work in the Edit Unit dialog (BR33589)
- 219533 Annoying dialog behaviour when maximising another application (BR33588)
- 217275 Connect: Deleting a Catalogue From Manage Catalogues Causes Scrollbar to Move to Top of List
- 217763 The BlockEvalTradePrices is not fully documented in PrefSpec (BR33516)
- 211274 Change Catalogue's Unit List Filter doesn't filter correctly (BR30593)
- 211192 Block Evaluation unsorts item list if sorted by "user defined" (BR30895)
- 214867 Report Script Issue - Table Column Line Rendering Issue (BR33435)
- 214949 Report Script Issue - Border Rendering Issue (BR33434)
- 179239 Default for preference EnableAdvancedInfoBar is enabled (BR32413)
- 211272 EDI Graph: Polygons for worktops will be added to a sub item instead to the main item (BR33140)
- 211273 Wrong hatch of a wall when more than one window was planned (BR33155)
- 211275 General Text fields not displaying correctly in customer details.
- 211188 Worktop isn't generated under the wall cabinet (BR33217)
- 211259 Worktop dimension is disappearing after re-open room (BR33183)
- 211260 Missing warning message when articles of a block become N/A when they are changed by switching DLT's or replacing it (BR33199)
- 211262 The description text is cut in the reports if you use a line break/Return (BR33222)
- 203946 Guide Rails disappear from the room when snapping unit dimension onto it
- 195233 Render settings dropdown is enabled and not ghosted in Export tab when multiview is applied
- 209367 RWZ - If no characters are stored in the "FreeText", this and the following fields will be deleted after reopen the RW (BR33331)
- 193928 Spelling mistake in 360 Panorama dialogue
- 208964 Incorrect Naming of Userstring in Connect (2020 Fusion) Welcome Dialog

1.6 6.0.3.9

- 232871 Crash when viewing layers in named view in supplied room
- 232975 Fusion crashes while closing a second room (under Windows 7)
- 232988 Dashed lines not printing (also not in Print Preview) when UseVectorLineRenderForPrinting = "1" is set in PPPrefs.ini
- 233079 Filter Behind Primary wall Not working
- 233799 Design goes blank in print preview for all the pages of batch print
- 234525 Print previews for the elevation view is scattered
- 230553 Angled Lines of Design Items Are Pixellated When Zooming in on a PDF Generated Using Fusion's Built-In Mechanism (BR33572)
- 232645 Fusion takes longer to re-render (3DE) after hiding then enabling a layer of 2020Cloud items
- 232931 Angled Lines of Design Items Are Pixellated When Zooming in on a PDF Generated Using Fusion's Built-In Mechanism - Batch Printing
- 234175 Fusion crashes when printing a converted room via 'Send To PDF' (specific 'Classic Fusion' room supplied)
- 234206 Quick Batch Print crashes on 2nd pass (Symphony Fusion application setup)
- 232264 Colour Fill render is display in black colour
- 232291 Corner Filler for base unit goes dark when rendered in Presentation (aka Flipped Polygon has wrong direction)
- 232394 Print Type : Worktops (Single Page) view shifted right side of the page on print preview
- 232487 Floor and Ceiling Coverings will not open (for supplied room)
- 232666 Manual Annotations do not appear when printing to PDF with Print areas
- 232736 Some menu in the CSM is missing when adding a window onto wall
- 232765 Batch Printing set up in Options is missing Elevation views
- 232978 Change material is not listed the 2020 Decorative Item (Glass) in the list
- 233227 KBBCConnect integration error in V6
- 233573 Plan view offset when using "Send To PDF" printer
- 233587 Unit list is completely missing for the elevation view when using "Send To PDF" printer

- 234406 Perspective view for wireframe is not display properly in the print preview
- 234540 Converted room with named views with the same name are not made unique when opened
- 232641 Unable to return to original position via Undo when using Navigate
- 232822 Cannot right click to select certain cloud models
- 232825 Position of browser within 2020 cloud is offset (sometimes)
- 232936 Additional Lines added to reports
- 232396 Tiling is not display properly in the movie when generated through the Draft render
- 233222 Item List "refresh flash"

1.7 6.1.0.52

- 229895 Unit List is not display properly when printing elevation view in "Send To PDF" printer
- 229904 AutoSidePanel doesn't work anymore (BR34036)
- 229908 Other design and presentation views become blank after applying a report (BR34160)
- 229915 Dotted witness lines are nearly invisible (BR34161)
- 229664 Converting old named view preferences doesn't convert layers correctly (BR34141)
- 210030 Radio Button and Checkbox are invisible in CE.exe in combination with Windows Classic or Contrast Design (BR33355)
- 228323 Crash during edit worktops after stretching edge (BR34081)
- 229481 Multiview is not printing all wall when printing through the "Send To PDF" printer
- 229482 Floor Covering incorrect when doors/windows are present in the room (3DE renders)
- 229483 Item List Position annotation doesn't work in a block evaluated room with group by links enabled (BR34056)
- 229485 Fusion does not correctly export models in AXS format
- 215027 White space when a door is added where walls join
- 215485 Catalogue Editor: Not Possible to Paste Shader Categories Entries
- 217084 No possibility to maximize the window/dialogue within CE.exe (BR33497)
- 219609 Cursor moves to start of Dimension field in the Items tab when tabbing between them
- 224119 Trimble 3D Warehouse Fusion Browser navigation and search functionality issues
- 226946 Unable to double-click in the main catalog window to open another view

Release Notes

- 227754 Print Areas For Plan View Does Not Work After Creating a User-Defined Named View and Disinheriting Layers
- 227756 Print Areas Does Not Work After Creating User-Defined Elevation Views
- 227884 Multiple dimensions are not showing as selected in second window when multiple window of same design are open.
- 229491 No page breaks anymore (BR34118)
- 229492 Named view wall annotation overlaps the info block (BR34116)
- 228735 Insight-Fusion INT v6: "Dimension exceeded message appears" after entering Length value more than maximum
- 209391 Some witness lines are missing from print preview of predefined tiling view.
- 229770 Tile zone auto dimensions are always marked as selected when viewing an elevation view
- 229857 Wall dimensions don't refresh after moving walls (BR34152)
- 229868 Debug only bug – Fusion crashes when trying to print/preview a tile zone on a wall that has been deleted
- 229921 Some installation symbols won't be shown correctly in v6 (BR34164)
- 229637 Script Error details not appearing
- 229883 Page Breaks not recalculating (e.g.: when design is amended to fit from two pages to one page)
- 229888 Page Break refresh issue between Print Preview and Plan View
- 230378 Incorrect Edge Grain Direction Behaviour
- 230660 Worktop angle get selected when clicking on the worktop dimensions
- 231084 Adding *Grundriss or *Wand 1 to a batchset is possible with AddNamedView but the pdf file has no pages (BR34206)
- 231118 Multiview is not updating the installation symbol after deleting and then adding it by using drag and drop
- 231191 Worktop Grain Direction lost in Named Views when converting v4/v5 rooms up to v6
- 231220 Named View Elevations lose dimensions and annotations when converted from v4/v5 to v6.0/v6.1
- 231221 Named View Perspective render incorrect once converted from v4/v5 to v6.0/v6.1 (HQ Present > Draft)
- 231348 Print area shifted left when adding from the batch set in the print preview
- 231349 Info block is missing for Print areas when printing a batch via "Send To PDF"

- 231678 Dimensions not printed for a Print Area when Batch printed via Send To PDF
- 232766 Batch Printing set up in Options produces a single blank page
- 232768 Presentation window does not stay frozen
- 231898 Manual annotation is display when loading "Print Type: Worktops (Multiple Pages)"
- 232853 Item List "refresh flash"
- 233042 Plan view dimensions flickering when moving annotation
- 233113 Named View Elevation squeezed into the corner in specific .ROM
- 233843 Naming convention is not followed when predefined multiple wortop view is exported while ordering.
- 233916 Exported design with the highest size entered looks faded and the dimension rail looks very light
- 234044 Grid is not shown on the exported file when its size is increased while exporting
- 234207 Batch Printed Elevation views coming up as UNDEFINED (Symphony Fusion application setup)
- 234485 TEST - ElevationNamedViewExport - With Print Areas & TEST - PlanNamedViewExport - With Print Areas export in Portrait Orientation even when Landscape Print Area is set
- 234503 Basic / Trade / Retail price button visibility issues in Block Summary
- 234795 Scripting .NET Execute() method fails on relative paths (BR34356)
- 235327 BlockSummaryStickyRetailIncVAT does not work as required and duplicates in PPPrefs.ini
- 235467 BlockSummary does not show the retail prices of the trade block by default (BR34383)
- 235915 Fusion crashes if DirectX renderer is not present
- 234157 Insight-Fusion INT v6: 2D image disappears from Fusion plan and also in Plan view stub attachment
- 230867 Auto annotation text, font and end style changes do not enable the 'Reset All' button for auto annotations (as it did in v5)
- 229625 Fusion hangs(sometimes crashes) when room is added to Quick Access Toolbar and then tried to close

1.8 6.1.1.4

- 237962 Customers asked to replace 2020 Cloud catalogues in v6 when opening converted plans
- 238141 Multi-View 'Send To PDF' Print only shows default Named View
- 238148 Floor extended too far out of the room in provided design

Release Notes

- 238162 Unable to add multiple Velux windows onto a sloped ceiling
- 238163 Crash when attempting to change default styles when all items are selected with 2020 Cloud items included
- 238167 Opaque view through Velux window in sloped ceiling in Perspective Draft render
- 238185 Crash when trying to link a catalogue in Catalogue Info (BR34460)
- 237020 Fusion switches to the ITEMS tab if there is a worktop using an additional style (BR34412)
- 237752 Multi-View Print Preview only shows default Named View
- 237767 No 'Cancel' button in Warning Mechanism dialog for AutoFeature Items in Additional Style Blocks
- 237375 Unable to export to DXF via Scripting (BR34355)
- 237445 Incorrect window behaviour in presentation renders.
- 232776 Black spots on presentation renders
- 236987 Horizontal Installation dimensions are not displayed on vertical virtual walls
- 238246 Parts of Exterior Door Not Rendering Correctly In Draft/Colour Fill
- 238309 KBB Connect error - Jpeg export failed

1.9 6.1.2.5

- 238789 Two named views with the same name, when converting an old room
- 239461 Multiple Info Blocks do not work
- 239465 ExportNamedView script function always exports the same perspective.
- 239611 Info Block logo is distorted on Export To PDF
- 239612 Unable to lasso select specific items
- 239811 Unable to open unconverted Fusion Classic Files
- 239952 Can't select sloped ceiling via right click select option
- 239953 You can't select velux window by left and right mouse click
- 239959 Can't drag sloped ceiling to another wall
- 239960 You can't select velux window by left and right mouse click
- 239961 Velux window is not displaying properly in elevation view

- 240069 Installing silent updates when running in Connect does not happen until restart (BR33409)
- 240280 You can't drag and drop item from catalogue palette after tried to change flooring
- 238787 KBB Script: 'Order Creation Successful' message no longer appears
- 238788 Adding multiple Velux windows results in them being set at different depths within the sloped ceiling
- 239448 Covering/Tiling do not tile the side recess/inserts of windows
- 239460 Generate Movie function only works if you have visited the perspective view first
- 239613 Crash when accessing named view on V5 converted .ROM
- 239691 Selection of the Order Script in supplier details can not be saved, so it can't be used (BR34466)
- 239949 Cannot type in the search box in the help system
- 239950 Unable to Drag & Drop items onto plan after adding catalogue to the room
- 240294 You cannot drag and drop the unit into the room when applying tiles onto the wall
- 240059 Lasso selection area is not as tight/precise in V6 with specific items

1.10 6.1.3.4

- 240578 Strange patterns appears on draft render (when the data has invalid textures)
- 240720 Draft render with theme set to none shows pitch black in specific .ROM
- 240721 3DE render is not display properly when adding sloped ceiling as well as velux window
- 240942 Style Details Preview images are very small (specific DLT's)
- 240944 Scrolling in Add Palette Auto Hide mode, zooms design
- 241239 Print border partially missing with Multi-View
- 242038 Fusion Crashes when multiview is zoom in by using the mouse wheel
- 238182 Cannot adjust/modify additional lights in provided .ROM
- 239951 Surface Issue with Sloped Ceiling containing Velux windows in 3DE renders
- 241726 Win 10: Changing ribbon causes application lag with latest windows update
- 242039 User can able to zoom in the multiview by using the mouse scroll wheel

1.11 6.1.4.2

241112 Can't select Floor/Ceiling with Select Surface at specific view angle

243424 Calculate area not working

244371 Cursor is not displayed properly in the design

1.12 6.1.5.1

247485 Unable to change DLT Colour Selection on a unit that contains unrelated Unit DLT options on every attempt to change the colour selection.

1.13 6.2.0.78

185889 Data Export Script Using All Fields Incorrectly populates the columns

219403 Option: "Price Change" in "PricingControlCentreOptions" shouldn't show in Fusion, if preference is disabled (BR33585)

229655 Cursor is not displayed properly in the design

232951 Floor extended too far out of the room in provided design

233470 Info Block logo is distorted on Export To PDF

233583 Installation symbols are sorted wrongly

233624 Unable to lasso select specific items

234786 Cannot switch between sides on a Double virtual wall

235442 Installation symbols placed at zero height produce dimension rails from left and right.

236291 Fusion switches to the ITEMS tab if there is a worktop using an additional style (BR34412)

236336 Can't select Floor/Ceiling with Select Surface at specific view angle

237228 The Align Rail Values flag won't be inherited correctly for saved named views (BR34439)

237229 Info Bar is not visible after switching to Report View (BR34437)

237686 Multi-View Print Preview only shows default Named View

237908 Non related dimensions move when another dimension is moved

236856 Cannot download and install Catalogues with flag 46 disabled (catalogue locking is failing)

238130 Multi-View 'Send To PDF' Print only shows default Named View

- 238151 Unable to add multiple Velux windows onto a sloped ceiling
- 238158 Opaque view through Velux window in sloped ceiling in Perspective Draft render
- 238169 Crash when attempting to change default styles when all items are selected with 2020 Cloud items included
- 238175 Crash when trying to link a catalogue in Catalogue Info (BR34460)
- 238336 Can't select sloped ceiling via right click select option
- 238337 Can't drag sloped ceiling to another wall
- 238342 Two named views with the same name, when converting an old room
- 238358 3DE render is not display properly when adding sloped ceiling as well as velux window
- 238383 You can't select velux window by left and right mouse click
- 238396 Draft render with theme set to none shows pitch black in specific .ROM
- 238790 Edit DLT dependencies does not show the correct information when the table is pasted back in
- 238798 ExportNamedView script function always exports the same perspective.
- 238386 Velux window is not displaying properly in elevation view
- 239444 Customise Status Bar has changed after Block Evaluation (BR34470)
- 239446 Multiple Info Blocks do not work
- 239704 Unable to open unconverted Fusion Classic Files
- 239991 IPDS Translation process, FULL_TEXT is used as recommended
- 240006 Installing silent updates when running in Connect does not happen until restart (BR33409)
- 240311 Confusing message for the user when installing child catalogs without a parent catalog in the silent process (BR34457)
- 240581 Fusion crashes when closed after saving a design with layout
- 240739 ConnectDatabase.SetCustomer does not update Fusion instantly (BR34478)
- 241208 Adding cuts to a worktop that has modified auto dimensions applied results in the modified dimension going wrong
- 241133 Print border partially missing with Multi-View
- 241204 Fusion Crashes when multiview is zoom in by using the mouse wheel
- 241489 Text boxes on navigate view palette(clipping pane,view from height etc) don't display properly
- 241506 Merging wall dimensions creates wrong dimensions (BR34506)

- 241654 Missing catalogues will be offered twice when opening an old room (BR33956)
- 241596 Fusion crashes \ throws unknown error message when click on the available print sets
- 241721 An unknown error occurs when tried to remove room in a batch set.
- 241802 Visible 'Linked' Items Are No Longer Listed in the Product List Key When Their 'Parent' is Hidden
- 242411 Fusion Crashes after canceling an exit then closing
- 242427 Views are getting added twice in a batch set also only rooms title is displayed(no add\remove buttons) in connect mode
- 242435 You can't move views up and down continuously in configure batch print sets dialog.
- 242652 Fusion crashing message came after giving background print and printing task goes in error state
- 242655 "The export has failed" message displays after exporting a design in pdf format.
- 242845 Fusion crashes after deleting a batch set and clicked on batch set in batch print properties
- 243452 Fusion crashes when removing multiple rooms from the Batch printing
- 243453 PDF report Export from Script displays incorrectly
- 243462 TLGraphicViewField does not display correctly in the report
- 243679 Magnified 'Hard Circles' Caused by Reflections of Portal Lights
- 243763 Fusion crashes when a report is attempted to print
- 243776 Report is not getting printed in pdf when added in batch set and printer for the report changed to "Send to Pdf"
- 243810 Print set is added twice after renaming the batch set
- 243840 All the selected rooms are not getting deleted in a rooms list of a batch set
- 243918 An unknown error occurs when printing the batch set which having user defined named view
- 243924 An unknown error comes when tried to print a report through quick print
- 244047 Print to file is not working when batch set is printed with quick batch print
- 244529 Unnecessary save as dialog(to save pdf) came while background printing of a batch set and when printer is set to xps document of a view.
- 245191 Fusion hangs when stretching edges while appying covering to ceiling\floor
- 245458 In the unit list in CE object class is displayed as "unknown object class" when units object class changed to ceiling fixture.
- 246273 Crash when changing the view in perspective for the supplied room (BR34298)

245014 Missing catalogues will be offered twice when opening an old room (BR33956) - Connect

246991 Colour of ceiling revert to gray(i.e. default) when a ceiling fixture is added.(RQ218950)

247268 Guide rail's green colour is overlapping on dimensions.

247274 Part of dimension vanishes when rail end style is changed in provided design.

247277 Crash after closing rooms (BR34594)

247304 Fusion doesn't ask for a replacement catalogue and deletes all items from this catalogue when converting the room (BR34613)

248147 Changing a DLT via Script does not refresh view although ForceResolve is called (BR34597)

248315 Componentise does not work in V6

248598 Fusion hangs when printing a Report Wizard report via Send To PDF

248842 Opening a room via scripting and using an OpenCreateScript creates a lot of runtimeerrors "No defined external function" (BR34656)

248873 Save Room .NET event does not work (BR34649)

249131 Crash after Import IDM in Child Catalogue because of invalid date format (BR34664)

249567 360 Panorama crashes with the ' Background360Panorama = "1" ' preference set

249623 Crash on close after cancel worktop styles warning dialog (BR34677)

249748 Unable to Print a Report (Hard Copy or PDF)

249440 Crash after Import Products in Child Catalogue when import file contains duplicate units (BR34646)

249069 Connect: User with Read Only access to previously created designs get message 'design is already open' and cannot access design

248820 Dimensions and guide rails are placed incorrectly in a room

248582 Horizontal dimensions (Walls/Units) not displaying in Elevation view

248591 After changing handle type - Sink graphically duplicates the cut out in a different piece of worktop

248167 Worktop dimension rail shrinks in the Elevation view when the worktop is rotated

248172 Dimensions of a non Parallel to wall unit gets scattered when its tolerance value is maximized

248288 Worktop Availability Symbol is very small in the print view.

247460 The provided room taking too much time(approx about 2 mins) to be opened in v6 and fusion crashes after closing the room

- 247490 Replacement catalogue dialog is not asked for all missing catalogues in the provided room.
- 247668 Dimensions are not getting updated after replace the highlighted item with the selection in catalogue item
- 247682 Dimensions of a unit i.e non parallel to wall change when another dimension rail is moved(Req-216078)
- 247303 RQ216078: Odd results after changing wall angle in the provided room (BR34614)
- 247011 Gap dimensions are not created correctly when a unit overlaps over another unit non parallel to the wall(Req 216078)
- 247025 Gap dimensions clash with unit dimensions if the unit dimension has a user defined distance
- 247101 Refresh issue with Island unit dimensions when rotating an unit
- 247102 The provided room cannot be opened in v6(BR34604)
- 247118 'Printing Starting' and 'Printing Ending' dialogs not appearing (Req. 226594)
- 247157 Base unit auto dimension fails to snap to an installation guide rail the first time it is repositioned over that guide rail
- 246793 Fusion is not asking save as dialog for the PDF print when printing through background
- 246844 Unable to change DLT Colour Selection on a unit that contains unrelated Unit DLT options on every attempt to change the colour selection.
- 246278 Single line tool for the windows doesn't track when zoomed in (RQ 202052)
- 246003 Crash when order creation in Insight
- 244647 Print areas are not display properly in the "Send To PDF" print when "As View" selected
- 244758 Wall is not fully hide when applying window and tiles onto the wall
- 244867 When Printing a birdseye view, the image is flipped
- 244884 Zero length auto dimensions displayed in elevation view
- 245007 Non-parallel to wall auto dimensions do not move with the guide rail they are
- 245008 Moving a dimension resets another modified auto dimension back to an auto dimension
- 243833 Available Views name changes after renaming the printset
- 243777 Right angle manual dimensions do not snap to other dimensions
- 243798 Wrong error message is displayed when giving invalid name to the Print sets (Actually that invalid characters are being allowed)
- 243465 Saved room creates duplicate room names in batch print sets when set for batch print everytime

- 243488 Fusion crashes when removing a room in Configure Batch Print Sets dialog
- 243490 Duplicate Room File names created when re-opening the Configure Batch Print Sets dialog
- 243504 Options/Batch Printing: Renaming a Print Set using invalid characters results in deletion of the Print Set
- 243457 (225668) Export View: Wireframe Missing From List of Renders in 'Render Setting' Dropdown
- 243057 Dimensions figures are display bigger in font
- 243064 Hide wall Does not work fully when using Advanced Wall option
- 242892 Fusion throws an unhandled Exception Error when Background Exporting multiple Named Views (Req. 225668)
- 242893 Document name is missing on the printing dialog when printing through "Microsoft XPS Document Writer"
- 242895 Exporting multiple Named Views as PDF fails (Req. 225668)
- 243357 Chosen printer doesnot include in the batch set when printing batch set through background print
- 243394 Error is thrown when a printed file is opened after batch printing
- 243397 Hide Walls not working in a Multi-View Named View (room specific)
- 243429 Elevation view walls are displayed incomplete in the PDF
- 242846 Font , Font Style , Size and Effects are not applied to the design to the main view when applied from the Presentation window
- 242851 Printer option under Print set view display blank when choose the Default Printer in the List
- 242659 Worktop is not display in the Export when export as Worktops (Multiple Pages)
- 242663 "Named View Wall Annotation" show with font size/rotation of selected user annotation
- 242675 Manual Annotation is missing when using "Send To PDF" print
- 242841 Unit when moved at a boundary vaule from the wall shows incorrect value for its distance from left/right of the wall
- 242653 Door is incorrectly illuminated in presentation renders
- 242446 Unit when moved within tolerance value from the wall shows incorrect value for its distance from left/right of the wall
- 242409 Moving the annotation to another position on view should not move the annotation on all of the named views it has been created for
- 242433 Annotations layers are not associated with the views correctly

- 242424 Dimensions left after units have been deleted which have had 'Dimension Right Angles' applied to them
- 242005 Navigate palette is blank when adding an unit into the room when palette is auto hide mode
- 242110 Hide Walls Does Not Work For Fully Tiled Wall
- 242111 Runtime error when closing Fusion during running script (BR34526)
- 242128 Slopped ceiling reflects the room in 3DE renders(BR34528)
- 242259 Dimension values refresh issue in a multi-view when layer is hidden under design window
- 242264 Dimensions show different in elevation compared to V5
- 242302 Moving a Window using the x position field move the window out of the wall in the Y direction
- 241604 Cannot adjust/modify additional lights in provided .ROM
- 241619 Niches are not drawn properly when using single line tool for the provided template
- 241693 Incorrect block status when using a block clearing system after applying trade block via scripting
- 241699 Lighting Rig not visible if walls are a certain height
- 241720 All views are not added into the print set views section
- 241519 Snapping indicators (Hotspots) are not display after undoing an item
- 241533 Design layout template is not display in the the multiview when user applying user defined named view
- 241205 User can able to zoom in the multiview by using the mouse scroll wheel
- 241376 Manufacturer light field does not update via copy/paste
- 241409 EANCOM: SA- for sub item even if it was ordered about the EDI dialog (BR34495)
- 241459 Win 10: Changing ribbon causes application lag with latest windows update
- 240935 Catalogue Verify does not resolve DLT dependent order codes correctly (and gives incorrect results)
- 238335 Surface Issue with Sloped Ceiling containing Velux windows in 3DE renders
- 241114 Report Wizard: unable to view report in Print Preview with a 'Report Wizard' created report
- 240584 The mirror room script fails to mirror modified auto dimensions
- 240593 The 'Dimension Item Centre' manual dimension option does not create a dimension that is half the width of a unit
- 240653 It takes much longer to open the AutoFeatures dialog with many catalogues installed (BR34480)

- 240656 Clipping does not work in elevation with a scale set
- 240411 Manually moving a dimension causes other dimensions to move
- 240414 White gap display between window and wall when moving the window to the other wall in 3DE renders
- 239638 Translation of Catalogue Items & Navigate View in the Add Palette
- 239639 Navigation palette is blank with user defined Layout
- 240063 Wrong measurements in EDIGRAPH File - measurements are rounded (BR33940)
- 240066 Centre point dimension does not display correct witness lines
- 239815 Standalone: Printing via background printing does not show Dealer Name
- 239851 Front overhang type preference is not set when starting Fusion with the "Startup" script preference
- 239938 The description text is cut in the reports if you use a line break/Return (BR34471)
- 239957 Missing dimensions after converting a room to v6 (BR34472)
- 238393 Selected floor material is not applied to the floor preview when sloped ceiling is applied into the room
- 238811 Generate Movie function only works if you have visited the perspective view first
- 239400 Selection of the Order Script in supplier details can not be saved, so it can't be used (BR34466)
- 239439 Cannot type in the search box in the help system
- 238494 Adding multiple Velux windows results in them being set at different depths within the sloped ceiling
- 238524 Mirrored room does not mirror the dimensions after a script execution
- 238573 Crash when accessing named view on V5 converted .ROM
- 238384 Covering/Tiling do not tile the side recess/inserts of windows
- 238371 Parts of Exterior Door Not Rendering Correctly In Draft/Colour Fill
- 238377 Unable to right/left click specific unit in provided .ROM
- 238343 KBB Connect error - Jpeg export failed
- 238157 Grainy view through Velux window in sloped ceiling in Perspective 3DE renders
- 236991 Horizontal Installation dimensions are not displayed on vertical virtual walls
- 237920 There's no gap between wall and border when printing an elevation view (BR34445)

- 237277 Unable to export to DXF via Scripting (BR34355)
- 236576 Editing a DLT Entry with invalid dependencies does not allow the invalid entry to be deleted.
- 236747 You cannot use Connect in Client/Offline mode anymore (BR34422)
- 236293 There's just one warning if there are worktops in multiple additional styles(BR34411)
- 236296 Some parts of the units out of wall in Elevation view are being displayed and overlap on the dimensions while printing
- 237446 Incorrect window behaviour in presentation renders.
- 237455 The font is changed when cutting and pasting a user added manual annotation in the room
- 237478 No 'Cancel' button in Warning Mechanism dialog for AutoFeature Items in Additional Style Blocks
- 237544 A Catmull-Rom Spline Patch surface type is not being rendered
- 237572 Worktop Availability is not updated visually in different Named Views (BR34441)
- 237583 Scrolling in Add Palette Auto Hide mode, zooms design
- 237648 Black spots on presentation renders
- 237652 Gap dimensions disappear when order codes are enabled and disabled
- 236186 Style Detail > Hide Invalid Options not recognizing ranges
- 233616 Style Details Preview images are very small (specific DLT's)
- 233078 One of the dimension disappear when offset of a dimension is changed in tiling predefined named view
- 227454 Connect: Print to PDF via background does not show Dealer Name (BR33987)
- 227560 When changing the default design style with no units selected a single unit changes to a new style block
- 227972 Edge symbols are not selected by default after Edit Worktops
- 230266 Fusion hangs when attempting to access a clean database after installation
- 230421 Light emitters only appearing in mirror
- 230494 Multiple opening of the same ROM file from different machines is possible in Windows 7 (BR34137)
- 231504 Crash when trying to add an preferred linked item for an highlighted item when using block items (BR34235)
- 232744 Dimensions are missing for the multi-view when printing through "Send To PDF" or XPS printer

- 223954 Insert Floor or Ceiling crashes with the supplied room (BR33874)
- 226064 Wrong Angle in EDIGRAPH File - Z-Angles and measurements are rounded (BR33940)
- 226617 different block situation when calling method "BlockEvaluationTrade" after the manually called BlockEvaluation (BR33964)
- 200405 Changes in Autosave Setting are not accepted (BR33157)
- 203690 PDF file is not getting generated when printing through "Quick Batch Print"
- 208203 ExportReportAsPDF does not work with rwz reports (BR33306)
- 129700 Applying a named view with hidden layers defined will result in hidden layers being applied to all other views (but units not hidden off in over views)
- 159910 Cash Payment Discount preference section is missing (when running in standalone) (BR31958)
- 171637 The [AddPalette] ItemListMinimumHeight preference is missing in PrefSpec (BR32240)
- 207699 The MinDongleCheckTime preference is missing in the PrefSpec document (BR33297)
- 226991 SetPrintViewsWithAssociatedUnits does not work (BR33989)
- 232845 Oblique dimension lines by using "Dimension Right Angles" (BR34294)
- 233621 Wrong Trade Price in Pricing Centre after deleting a Graphic item (BR34304)
- 218864 Info block is missing for print area when printing from "Send To PDF" for the batch print
- 236146 Unable to scroll down to bottom of Trimble 3D Warehouse dialog box (in default size)
- 236163 Issue with moving a rotated 2020 Cloud Item
- 235036 Lasso selection area is not as tight/precise in V6 with specific items
- 234142 Grain direction for the vertical worktop is missing from the print preview when loading from "Batch Print"
- 237441 Changing default style adds a new style and change it for the first item (BR34431)
- 237965 Customers asked to replace 2020 Cloud catalogues in v6 when opening converted plans
- 238177 4K: Text is moved in the Navigate View palette when the palette is increased in wide - some of the input fields will disappear (BR34459)
- 239632 Duplicate strings in userstrings
- 240132 Remove references to v5 Render setting from the v6 PrefSpec document
- 240269 Background not displaying in 1 window in Presentation render - Provided Design
- 241036 Layer colour displayed in the navigate view when in elevation (BR34057)

- 241494 Guide Rails become diagonal when a dimension is deleted and then undo is used.
- 241534 Walls of the room is disappear from the print preview when adding user defined named view
- 241747 Catalog Verify: No ERROR reported if a unit optimizes to itself
- 242309 2020 Cloud: Various Tooltips not displayed within 2020 Cloud Browser Combo list boxes (Ex Mouse over a catalog name)
- 242021 RGB values will be changed automatically (BR34520)
- 242649 Parts of dimensions of a plan view in multiview disappear after moving a manual annotation.
- 242852 User can able to type in the printer dropdown in the Print Set Views
- 243436 Cursor is displayed in the design printed to PDF via batch printing
- 242954 Background appears blank on a wall if a unit is out of bounds (3DE only)
- 243354 Some elevation views dimensions are displaying big\bold after going through print preview of a batch set
- 243837 Clashing is not resolved for manual right angle dimensions if they are dragged onto a guide rail that is in a different direction to the dimension
- 243814 "Delete..." , "Edit..." , "Rename..." buttons are ghosted when click on the Print Set after delete and add it again
- 246038 RQ233505: Userstring issues in the new dialog (BR34589)
- 246667 Spelling issue with the Maximum Distance from wall preference tooltip
- 246976 Screen appears red in Edit Worktops when zoomed in 6 times (Req. 202052)
- 247767 A non-translatable string is displayed in the info block when viewing worktop single/multiple page
- 242431 Manual Annotation dialog: 'Shown in' checkboxes duplicated when selected
- 211279 Trial version expires before its EndDate

1.14 6.2.1.1

- 250302 Fusion crash and high memory usage / leak using Windows 7
- 250301 Memory Not Released with Floor/Ceiling Covering (Windows 7)

1.15 6.2.2.2

- 250961 KRPAO is extremely sensitive in Google Chrome 66 for Android
- 250808 Unable to use the 'Enter' key to accept changes in Auto Features

Release Notes

1.16 6.2.3.1

251246 Added Criteria Fields in the Catalogue Items Palette aren't the same if you use a V5 ppprefs in V6 (BR34723)

1.17 6.2.4.8

252314 Unable to publish movie using Presentation & Presentation Plus

252669 Crash when clicking Batch Print Properties if certain .PRS file is present

253327 Worktop Editing with Annotated Plan

253717 Range Change - Colour Issue (Unit DLT's) (Windows 7)

252339 360 panorama view in VR mode is not stable and uncontrollable

251944 Certain ceiling fixtures not transmitting light in Draft & Colour Fill renders

252308 Layouts change when moving a item

251412 RQ220098: No snapping indicators for the +Tiling Plan (BR34722)

253714 Fusion freezes after changing the ranges more than 25 times (Windows 7)

1.18 6.3.0.72

227618 Switching between pages in a batch print including a report is much slower than in version5(BR34035)

245711 2020 Fusion crashes/hangs on Windows 7 with AMD GPU

- 252291 Freehand Multi-Point covering zone is showing artifacts when zoom the floor area and move the covering zone (RQ 244567)
- 252300 Stretch edge points still display on covering zone after zoom out the view (RQ 244567)
- 251947 Certain ceiling fixtures not transmitting light in Draft & Colour Fill renders
- 251925 Fusion freezes when tiling for a hidden wall is removed
- 251384 Req. 234111: Strings not translatable in the Apply Modifiers dialog
- 251395 Tiling Preview dark when compared to Elevation / Perspective views
- 251248 Added Criteria Fields in the Catalogue Items Palette aren't the same if you use a V5 ppprefs in V6 (BR34723)
- 251177 RQ233509: You can select a VAT profile when adding a catalogue to a room (BR34719)

- 250563 Measurements of Installation Symbols on same horizontal line will be merged into one when activating "Heights From Floor". (BR34699)
- 251160 Witness lines are not associated with starting point of the installation symbol
- 250968 Background Export for Export To BMP is not recognizing "HideOrderCodeHeightFromFloorForVerticalDimsInElevationView" preference (RQ 236875)
- 250972 Unhide option is enabled though there is no hidden named view when switched from other view
- 250982 RQ240918: If certain symbol characters are used, the Named View Name doesn't appear as required
- 251048 Error message for render not supported is thrown in the print preview though the render is available
- 251049 360 panorama view in VR mode is not stable and uncontrollable
- 250965 Export To PNG option for the "Background Export" is not work anymore
- 250951 Background print is not recognizing the "HideOrderCodeHeightFromFloorForVerticalDimsInElevationView" preference when using Send To PDF or Microsoft XPS Document Writer (RQ236875)
- 250952 The preference 'HideVerticalInstallationDims' hides off horizontal auto installation dimensions
- 250855 Layer settings are not recognising for +Installation Wall 1 view when installation symbols are added into another view
- 250617 Order-code is completely missing from the elevation view and display "Wall" instead of the order code
- 250692 Extra dimension is created in the elevation view when applied tiling to the wall
- 250729 Unable to use the 'Enter' key to accept changes in Auto Features
- 250821 Transparent patch is display on panoramic sender window
- 250831 Dims preference has 30 entries but pref spec only details 28
- 250559 Update price checkbox in the room validation wizard does not get ticked and changes it position
- 250541 Elevation view does not refresh after hiding the named view
- 249750 Unable to Print a Report (Hard Copy or PDF)
- 249879 Unable to create any new designs in Connect
- 249931 Memory Not Released with Floor/Ceiling Covering (Windows 7)
- 249981 Wrong block evaluation result: missing colours and wrong columns (BR34682)

- 249392 Crash after Import Products in Child Catalogue when import file contains duplicate units (BR34646)
- 247495 Dimensions still display in multi-view even though they turned of in elevation
- 249127 Auto dimensions do not update when a unit is repositioned via edit fields within the item ribbon
- 249066 Room does not open correctly in perspective view and does not render(34660)
- 249072 Connect: User with Read Only access to previously created designs get message 'design is already open' and cannot access design
- 249063 Dimension worktops at backside does not produce the same dimensions for corner worktops as in v5
- 248776 Hole in floor when custom material is applied
- 248821 Dimensions and guide rails are placed incorrectly in a room
- 248827 Horizontal dimension created with "Dimension right angles" disappear when provided room is mirrored.
- 248829 Duplicated dimensions in Worktop Plan after generating worktop (BR34638)
- 248602 Certain Building symbols from German installation catalogue do not dimension in V6
- 248609 Checkboxes are not unchecked correctly in prices stage of room validation
- 248583 Horizontal dimensions (Walls/Units) not displaying in Elevation view
- 248312 Improper argument shown when replacing items with Alternative style with provided catalogue
- 248471 retrieve design from newer Fusion version means user can't work with Fusion anymore
- 248127 Inconsistent Style Details Information in Item List
- 248286 Dimensions of a non Parallel to wall unit gets scattered when its tolerance value is maximized
- 248289 Worktop Availability Symbol is very small in the print view.
- 248303 Worktop dimension rail shrinks in the Elevation view when the worktop is rotated
- 247110 Still able to select lights through clipping plane
- 218489 Download Customer Read Only fails with 'Failed read-only download of the customer' dialog
- 246834 Change scale in the Elevation view with a virtual wall, ensures that the items behind the Virtual Wall are hidden (BR34592)
- 244755 "+Worktop Plan" shifted left when adding worktop from Autofeatures
- 244760 In the file of an exported view with print area the print area is cut off on one side and is get out of place on the other side (BR34570)

- 244774 Wrong export from polygons for the EDI graph file (BR34568)
- 242244 Cornices dimension is duplicated after moving
- 242249 Print Areas is not exact on the print out
- 233730 Grain direction is missing for the Print Type:Worktops (Multiple Pages)
- 235127 Tiling wall appears Black in the Preview when any other Theme than 'None' is selected (specific room file)
- 235325 Undo/Redo event not added when adding/deleting a unit via .NET scripting (BR34361)
- 168649 Unable to choose a specific range within multiprice report and unwanted cursor icon
- 172706 Block with locked price will be ignored by the margin report (BR32292)
- 160837 Provided customer logo won't be fully shown in info block (BR31963)
- 165140 Block summary and block evaluation show different room price after block when dealing with a clearing system block and different blocking factors to standard factors
- 198946 Connect: Checkout Customer dialog shows incorrect message when customer is downloaded read only
- 198954 Connect : New option under Designs tab in customer screen is enabled in offline mode after Download Customer Read only
- 200127 The Room Validation Wizard doesn't open in a situation where it should open (BR33128)
- 202960 The supplied room crashes when entering perspective View (BR33224)
- 208901 N/A Item in Combination with Global Discount Leads to Wrong Prices in the Infobar (BR33339)
- 198949 Connect : Fusion initially allows user to re-download customer read only
- 166379 Block dialog shows wrong room total when a unit with percentage based pricing is used (BR32101)
- 181675 You can open the Manual Annotation dialog during Edit Worktops (BR32461)
- 182137 The annotation is cut in print when a specific font size, font and style was chosen (BR32456)
- 183483 Content is wrong, if you select the headline in manufacturer details after selecting specific (BR32539)
- 188375 It is not possible to replace a material with another with the same ID number
- 129875 Ctrl+O does nothing, despite being a visible shortcut in the UI
- 149722 Colour table materials RGB (180,165,255) is not duplicated accurately (BR31648)
- 235778 Wrong Trade Price in Infobar when using very large factors (BR34392)

Release Notes

- 236123 Scale View (e.g.: 1:20) design is duplicated over 2 pages (should be split between them)
- 237096 Dimension is not getting updated in the plan view when applying "Dimension Rails Behind in Plan View"
- 237553 Scripting: CountPredefinedViews(kAutoGeneratedNamedPlanView) return 0
- 238380 Edit DLT Entry Dependencies: 'Copy Grid' and 'Paste Grid' buttons disappear as the mouse hovers over them
- 241371 Cannot Launch Edit Graphic Fixtures From Perspective View (Unless Previously Done From Plan or Elevation View)
- 242263 Designs are archived that should not be archived at all (BR34532)
- 242280 No designs for cloud elements (room file supplied)
- 242847 Importing a block file where a block exist two times, Fusion duplicates the block items (BR34539)
- 243458 DXF report Export from Script displays incorrectly
- 243474 Error message is not shown when the print render is set to presentation renders for a plan view when printing
- 229771 The print option 'Send to PDF' does not work when then main view is item list and the print/preview is a graphic view
- 232147 Wall Dimensions do not show on all walls in elevation in the supplied room (BR34269)
- 232793 Wrong Trade Price in Pricingcentre/Margin Report (BR34297)
- 244790 Copy and Paste from Excel to CE (Czech) fails when the data contains certain UNICODE characters
- 246813 Simultaneously changing the depth of several articles also changes the Length of an article (BR34590)
- 195165 Filter in Floor Covering selects the wrong tile
- 224422 While batch printing in the background only the actually open planning is printed. (BR33893)
- 224693 Annotations and dimensions move away in a design when zoomed and scale is changed
- 247117 Switching to cm measurements leads to error messages after generating worktop and plinth (BR34553)
- 247281 Grain direction is missing for the worktop when adding from "Single Line Tool" / "Multi-line Tool"
- 247006 Height Table: No automatically default value for series, if you have more than one (BR34587)
- 247078 Worktop Joining error because of too large worktops though there aren't too large Worktops (BR34602)

- 248522 Named View Wall Annotations from selected walls remain highlighted in the print(BR34645)
- 247943 RQ202052 Artifacts appear when adding cuts in Edit Worktops/Graphic Fixtures/Flyover Shelves when zoomed in, also when stretching edges and split selected edge
- 247944 A non-translatable string is displayed in the info block when viewing worktop single/multiple page
- 248706 Without Dongleflag 70:No Prices in Block Summary in "Show Trade Block" if there exist a different Trade than Retail Block (BR34617)
- 248711 Wrong orination applied to worktops views when changing the print type from Batch Set to Worktops views
- 249111 (RQ247987) L / T / Top Position fields updating when a wall in the same plane isn't visible in Elevation
- 249115 Vertical dimension is missing for install symbols (dimension install symbol centre) (BR34666)
- 249882 Room Validation Wizard shows a price difference if a item uses a different VAT category (BR34683)
- 249773 "There should be at least one DLT entry selected" cannot be translated in the factor section
- 250547 Vertical dimension line is missing for manual installation symbol dimensions (BR34698)
- 250560 Sunlight direction not mirrored (when mirroring room)
- 250055 Erroneous Heading on Reset Quick Access Toolbar Confirmation Dialog
- 250153 Named View Wall Annotations from selected walls remain highlighted in the exported file
- 250620 The unit does not get highlighted on selection when switched from another named view
- 250627 Hotspot indicator is not recognizing when using "Dimension Installation Symbol Center" / "Dimension Item Centre" tools for the rest of the walls
- 250677 Automatic numeric annotations change by converting the room from V4 to V6 (BR34707)
- 250687 Navigate palette does not get refresh after switching between walls
- 250943 Edge of the wall is disappear from the view first time when Align Rail Values option is enabled
- 250948 Walls saved as a grouped item, are not selectable in elevation once added
- 251155 HideOrderCodeHeightFromFloorForVerticalDimsInElevationView = "1" doesn't work anymore (BR34716)
- 250979 Views under multi-view are not getting updated as per layer settings
- 251374 Scale won't be applied to the predefined print view options (BR34728)
- 251188 RQ220098: No snapping indicators for the +Tiling Plan (BR34722)

- 251207 Print Areas get lost after Converting a Room from V5 to V6 (BR34718)
- 251917 Standard Wall / Advanced Wall covering display bright as compare to previous versions
- 252301 Unhide option is not enabled for a named view when a deleted action is undone for a wall
- 251968 Unhidding a named view does not select the next named view tab
- 252367 Dimension rail is placed incorrectly in the print preview for a worktop
- 252546 White screen when changing from a 3DE render to Draft after changing the Scene setting with the ceiling fixture present (BR34726)
- 252967 Wall tiling displays hotspots for walls not visible in the view
- 253288 Applied background will be lost after converting a room from v5 to v6 (BR34778)
- 253293 RQ227873: ESC doesn't disable the white or black picker (BR34785)
- 253059 Coloured annotation text does not display the underline as coloured in the printed PDF
- 253060 Striked line of a striked out annotation is not displayed in the printed PDF
- 254178 You can see the grain direction on the +Worktop Plan view when printing through Send To PDF (RQ240291)
- 254389 Once a Cloud item is added, Custom report shows blank
- 254619 Printing a Report Wizard Report via PrintReport or PrintReportEx is not possible (BR34796)
- 254752 Elevation view modified auto dimensions on left or right hand wall do not behave the same as on top or bottom wall
- 255244 A black patch is displayed in the elevation view when scale is changed to 1:1
- 255248 Crash after undo and save (BR34804)
- 255735 Empty pages created in multi worktop view for non-graphical worktops (BR34845)
- 255530 Grain direction for a worktop plan appears then disappears when added in multi view
- 256980 ReportWizard takes much longer to open if run from Fusion (in Connect mode) (BR34733)
- 258099 Annotation Text is cut and not completely displayed in Print Preview and PDF Print (BR34813)
- 258100 Annotation Text is partially hidden by the Navigate View palette (BR34701)
- 257367 Incorrect/Missing Icons in the Effects tab
- 241547 Sloped Ceiling tool-tip grammatical issues
- 129683 Unable to tab to wall layouts in wall layout wizard
- 129685 Moving very large annotations causes the room to zoom out very far

191892 "Back" button on "Change Catalogue" dialog gets enable after canceling warning message dialog
