

Offering

Module	
Inspire	Interact with a gallery of virtual showrooms, each with different styles and layouts to choose preferred products and materials. Choices made in Inspire can be applied to a design in Define.
Define	Design kitchens, bathrooms, living rooms, bedrooms - any room of the house in a fun and immersive 3D space planning tool.
Optional Modules	
Kitchen Auto-Design	Preview instant designs without any manual editing, that are adapted to the customer’s room size, functional needs and design preferences.
Collaborate	Gather all project information starting with photos, designs, tasks and discussions. Everything that is needed to manage and finalize a customer’s project.
Integrate	Connect business systems to key application functions such as login, pricing, ordering, project access and project update using a development API toolkit.

Features by Module

For Retailers		
Inspire		Define
Browse virtual showroom designs featured by room type, style, price range or design characteristics		Search submitted customer projects using different criteria
Pick and choose preferred products and materials in an interactive viewer		Join and open a customer’s project to assist the consumer
Provide indicative or accurate pricing information to guide in the product selection		Use the same design to propose revisions that customers can explore on their own time
Capture valuable analytics and user information about consumer choices		Add recommended products and services to complete the design and product list
Kitchen Auto-Design	Collaborate	Integrate
Configure auto-design rules according to preferred design and recommended safety guidelines	Share additional project and product information	Expose the same commercial information and retail services found in other retail channels
For Consumers & Retailers		
Inspire		Define
Start a design in 3D from the selected list of products and features		Draw room floor plan with accurate measurements
Change colors, styles and designs		Manually place cabinets, appliances, furniture and accessories in a room. Refer to warnings to improve the design.
Change cabinet door styles together with materials and colors for countertops, backsplashes and flooring		Change product materials and colors on an existing design either per product or for the entire room at once
Swap appliances, sinks and bathroom fixtures to match the decor		Configure product interiors such as drawers or cabinets
Save and apply various features & options (colors, materials, finishes, products) as favorites		Consult product list for the design recommended products and/or services
Use the selected showroom as a starting point for a new design		Submit a design to a store employee or buy online whenever applicable
Kitchen Auto-Design	Collaborate	Integrate
Choose preferred appliance types based on functional needs	Invite other collaborators to contribute to your design project	Benefit from a connected and unified retail experience across applications
Resize or move functional cabinet zones and determine the location of different appliances	Upload photos of your home that are useful to your project	
Preview a kitchen design created automatically by the tool	Discuss and share additional project as well as products information	

Minimum System Recommendations
