

## System Requirements for Promob Maker

### Processor

- Minimum 2 GHz Multi-core processor
- Compatible with 32 and 64 bit (64 bits recommended)

### RAM Memory

- 8GB or higher

### VGA

- 3D board with dedicated memory of 1Gb off board or higher, supporting OpenGL
- Recommend NVidia VGA
- VGA driver must be updated according to the manufacturers' releases (outdated drivers will negatively impact performance)

**\*\*There are restrictions using Intel, SIS and Nvidia model GeForce 210 VGAs**

### Disk Space:

- 6 Gb or higher

**\*\*We recommend an SSD device**

### Internet Connection:

- 10 Mbps Uploading and 30 Mbps Downloading (lower latency 200 ms)

### Operational System and applications:

- Windows 10®
- .NET Framework 4.8

### Notes of importance

- Promob does not run in Virtual Machine
- Promob installation cannot be done in a net unit
- Promob is not compatible with Windows Server
- Recommend Windows is up to date with the updates made available by Windows Update®
- Windows 10® must be legalized so that Promob performs in its entirety
