

Example 1:
Customer had framed artwork. Specific size 1" frame, overall is 48" wide by 36" high.
I used a mirror w/frame, made the frame 1" so that would mean the picture should be 46" wide x 34" high.
I imported the picture into 2020, I set the size at 46" wide x 34" high.
These are the results, a messed up looking piece of art.

Note: This drawing is an artistic interpretation of the general appearance of the design. It is not meant to be an exact rendition.
